(54) WATER TREATMENT DEVICE AND MEDICAL TREATMENT APPARATUS UTILIZING MAGNETISM AND FAR INFRARED RADIATION**(57)Abstract:**

PROBLEM TO BE SOLVED: To improve medical treatment effects due to the synergism of permanent magnets and natural stones by disposing a mixture of powder and granular material of natural stones on each side of a pipe through which tap water flows and placing a permanent magnet outside the natural stones to activate water flowing through the pipe.

SOLUTION: A permanent magnet 3 is disposed inside each of left and right side flat bars arranged in a case body 1a of a case made of aluminum and natural stones 4, in the form of powder and granular material, are disposed between the permanent magnets 3. The stones 4 are preferably a mixture of crystal and tourmaline. And a frame 5 for setting a pipe is stored inside the natural stones 4 and a frame 5a for pressing a pipe is formed under a cover body 1b to fix a pipe P. If water such as tap water is caused to flow through the pipe P, the water is purified and activated by the magnetism and far infrared radiation from the stones 4 and magnets 3 disposed on the opposite sides of the pipe so that water having improved medical treatment effects can be obtained.
